**Subject:** Re: EPA Fining Bloom

The exact amount of "one time revenue" for Q1 2018 from the Schumer Bloomer Investment Tax Credit is \$43.9 million. Without this accounting manipulation Bloom had negative gross margin and also would have lost \$61.6 million for first quarter 2018.

Also Interesting is that Colin Powell who begged Speaker Ryan for the reinstatement of the ITC back in 2016 has 232,500 shares in the Bloomdoggle.

Remember how Con D Rice gamed KIOR, Let's see what happens with trading of Bloom shares. There are even more deep staters in the Bloomdoggle. Mary K Bush and Kelly Ayotte also have shares.

Per the S1 The EPA is trying to levy a fine of One Million Dollars on Bloom.

<https://www.sec.gov/Archives/edgar/data/1664703/000119312518190488/d96446ds1.htm>

This is small potatoes and probably a small slap on the wrist by sloppy Scott Pruitt and his team. Bloom claims to be fighting the fine.

I think the fine is far too small and as I was the tipster to the EPA on the hazmat, I am not willing to let US Taxpayers settle for a pittance just because Doerr owns all the US Democrat Senators.

The US EPA must get tens of millions of dollars from Bloom and their Bloomdoggle. Remember Bloom is Flint on Steroids.

I could not find mention of the US FTC suing Bloom for Greenwashing under the Green Guides. Ms. Koss has the US FTC lost the file that Senator Feinstein was assisting me with ?

As for the SEC settlement with Advanced Equities and the minnows Daubenspeck and Badger, I could not find this referenced in the S1.

I did find mention of the lawsuit that Jack in the Bloom Box Markell settled with FuelCell Energy for constraint of trade in Delaware.

I did find that Bloom added the recapture of the 30% ITC that Schumer the Bloomer gave them and this inflated first quarter 2018 revenues by \$45 million and also first quarter gross profit by the same amount.

I did read the nonsense published by Greentech Media today on the IPO. How stupid can one be!! If Bloom lost \$2.3 billion and has tons of debt on the balance sheet how could they have only raised \$2 billion of debt and equity? More crap from the gangrene press.

Yuliya, Bloom lied to you they were profitable in 2016. They were not. They also lost a lot more than \$100 million in 2017.

The S1 also exposes Asim Hussain's lies about ethane not effecting the efficiency of the Coffins. The S1 also states the 65% efficiency is only for brand spanking new Bloom coffins (beginning of life).

The class A shares will have only 1 vote while existing Bloomdogglers with their Class B shares will have 10 votes per share.

As I have batted 1,000 on the Bloomdoggie using only the laws of thermodynamics I make this forecast. If Bloom has the IPO they will have to raise between \$400 million and \$500 million else they will not have enough money to continue the Bloomdoggie.

More to Follow. But I want the SEC, FTC, EPA to uphold the rule of law and to dispense equal justice under the law. That Baby Fund My Fire Doerr and his wife gave \$1.75 million to senate democrats should not influence the deep staters at FTC, SEC, EPA, DOJ etc. etc.

GREEN LIES MATTER
